Summary

Full Stack Developer specializing in React, Next.js, and Node.js, building scalable web applications. Focused on performance, architecture, and AI-driven features, with proven impact on system efficiency.

Skills

- Frontend:** React, Next.js, TypeScript, Tailwind CSS, Redux, Zustand, React Native, Expo
- Backend:** Node.js, Express, Fastify, Strapi, Prisma
- Database:** MongoDB, SQL, MySQL, Supabase
- Tools:** Git, CI/CD, Docker, Vercel
- Other:** Claude Code, Codex, Copilot, Cursor, REST APIs, OpenAI API, SSR/ISR, Performance Optimization, Google Cloud Console (OAuth 2.0, Firebase Analytics)

Experience

Full Stack Developer – theBuidl

02/2025 – Present

- Delivered production-ready web applications independently and as part of development teams, with full cross-device responsiveness.
- Built a cryptocurrency exchange platform with **analytics dashboard** from scratch, delivering real-time data visualization and complex UI flows
- Designed scalable architecture (Next.js, Strapi, SSR/ISR, caching), **improving response times by 15–25%**
- Implemented state management (Zustand) and reusable UI system for faster feature delivery
- Improved performance (code splitting, lazy loading, SVG/WebP), achieving **Lighthouse Performance 95+**

Full Stack Developer (Freelance)

01/2024 – 02/2025

Reel-Reveal | Movie Discovery Platform · Full-Stack Developer

- Built full-stack movie discovery platform from scratch with **AI-powered** recommendations (OpenAI) and optimized TMDB API integration (SSR/ISR, caching)
- Reduced OpenAI API costs by ~20%** through prompt optimization and efficient token usage
- Implemented secure auth (NextAuth, Google OAuth) + configured Google Cloud Console for OAuth 2.0 credentials and Firebase Analytics

TeensUkraine | Educational Quiz Game · Front-End Developer

- Built real-time game interface and admin panel for live sessions
- Implemented gameplay logic (timers, scoring, dynamic tables)
- Created reusable UI components (modals, loaders, popups)

TeraTeam | Startup Collaboration Platform · Front-End Developer

- Refactored application architecture and folder structure, improving maintainability and scalability
- Developed complex forms using React Hook Form, Yup
- Optimized** performance (SVG sprites, lazy loading, code splitting) → **~25% faster load time**

Education

GO IT School <i>Full Stack Development Program</i>	09/2022 – 09/2023
National Aviation University <i>MA Degree in Energy Engineering</i>	09/2000 – 06/2006

Languages

Ukrainian — Native | **Russian** — Native | **English** — B2
